

# MANUAL STATIONS

## NON-CODE

UNDERWRITERS LABORATORIES LISTED

CALIFORNIA STATE FIRE MARSHAL LISTED NO. 7150-038:3

### GENERAL:

These Units are very dependable Manual Stations intended for simple yet failsafe operation.

### AVAILABLE IN ANY LANGUAGE

Model NC-S1 (single pole)  
NC-S2 (double pole)  
NC-S3 (single pole)

- Actuating switch is a heavy duty plunger type.
- Glass plate (2-1/2" x 2-1/2") is a Factrolite single strength (obscured) type. Design of this station is such that it seems to inhibit the "false alarm" factor that is so prevalent in public schools and places of public assembly.
- The steel rod attached to the station is not necessary to break the glass. A slight blow of the hand, coin, key pencil etc. is sufficient to break the glass and initiate the alarm.
- The stations are intended for mounting in a standard electrical outlet box.

Model NC-S3 is physically identical to the S1 and S2 models, but differs in the actuating switch construction. The Model NC-S3 uses a Micro Switch and is also approved for installation in public school buildings.

W.P. MOUNTING BOXES ARE AVAILABLE FOR ALL THREE MODELS.

**MADE IN THE U.S.A.**

# SPECIAL PURPOSE MANUAL STATIONS W.P. MOUNTING BOXES

**Model: NC-S1-E (single pole)  
NC-S2-E (double pole)  
NC-S3-E (single pole)**

- These are break glass stations intended for emergency control of electrical equipment (motors, pumps etc.).
- The emergency switch can be actuated by striking the glass.
- Physical construction of these stations are identical to other NC-S models.

**Model: NC-S1-P (single pole)  
NC-S2-P (double pole)**

- Both models are standard Manual stations with an added key-operated single pole switch for the purpose of pre-signal initiation.
- The pre-signal feature is added to sound an alarm on selected pre-signal devices only. This allows the proper supervisor the opportunity to investigate and, if necessary, turn the key to sound a general evacuation alarm.

**Model NC-BB**  
W.P. Back Box for all  
NC Manual Stations
